

NEW ZEALAND POLYTECHNICS

Manukau Institute of Technology (MIT)

Manukau Institute of Technology Website

The MIT will continue to offer Experience Days where students can take part in an interactive programme designed to check out specific training areas. These will be advertised in the Daily Notices and on the whiteboard outside SAS.

The Bachelor of Applied Communication prepares graduates for careers as communications specialists in organisations and business. The specialisation in technical writing is sought after by employers.

The Diploma in Shipping and Freight is a one year course which teaches the skills for working in import/export shipping and freight organisations engaged in the transport of goods by sea or air. This is a growth area and there is also a short course available now.

Green Careers at Unitec

Guide to Unitec Online Applications (pdf)

Want to protect the planet? Study for a green career and you could find yourself protecting New Zealand's landscapes from pests and diseases, advising businesses and the government on environmental issues, or helping to save the near-extinct Sumatran tiger. A qualification from Unitec can lead to loads of exciting and intensely rewarding job opportunities, both here and overseas. If you'd like to find out more go to www.greencareers.unitec.ac.nz
